

ModelChecker: A Semantic Model Checker for Modal and Counterfactual Logics

Author Name^{1*}

^{1*}Department, University, City, State, Country.

Corresponding author(s). E-mail(s): author@example.com;

Abstract

Abstract text goes here. The abstract serves as a general introduction and brief summary of main results. For Journal of Automated Reasoning, check specific guidelines for length limits.

Keywords: model checking, modal logic, counterfactual logic, SMT solver, Z3

1 Introduction

Introduction text goes here.

2 Background

Background and related work.

3 The ModelChecker Framework

Main technical content.

4 Implementation

Implementation details.

5 Evaluation

Experimental evaluation and results.

6 Conclusion

Conclusions and future work.

Declarations

Funding

Not applicable.

Conflict of interest

The authors have no conflicts of interest to declare.

Ethics approval

Not applicable.

Consent to participate

Not applicable.

Consent for publication

Not applicable.

Data availability

The datasets generated during the current study are available in the ModelChecker repository.

Code availability

The ModelChecker software is available at [repository URL] under [license].
